The desire to establish European quality and service standards became the first step towards founding the company.

FROP is about making quick decisions and providing large-scale cost estimates for our clients. We value the uniqueness of our clients, as FROP clients are businesspeople who want to make money and understand the value of their time.

That's why we offer not just simple furniture, but ready-made solutions. Vasyl Fetsenets

## F<sub>rop</sub> W<sub>ooden</sub> C<sub>orporation</sub>

Frop Wooden Corporation was founded in 2014 and has been successfully manufacturing furniture for hotels, restaurants, business centers and private properties.

We produce solid wood furniture, case furniture, upholstered furniture, metal elements and constructions. Our overall production capacity is approximately 6000 square meters.

Frop Wooden guarantees efficiency, high quality and on-time delivery.

# Hotel and restaurant complex «Vedmezha Gora»

The main goal of the company was the prompt and comprehensive implementation of the project, starting from the selection of high-quality materials and detailed planning of the work, to the installation of products in the hotel complex.

Stone veneer cladding in the entrance area, as well as decorative elements made of logs, added uniqueness to the interior.

Thanks to the professionalism of the team for taking into account all the necessary technical characteristics, which ultimately guaranteed a high level of wear resistance of the products.

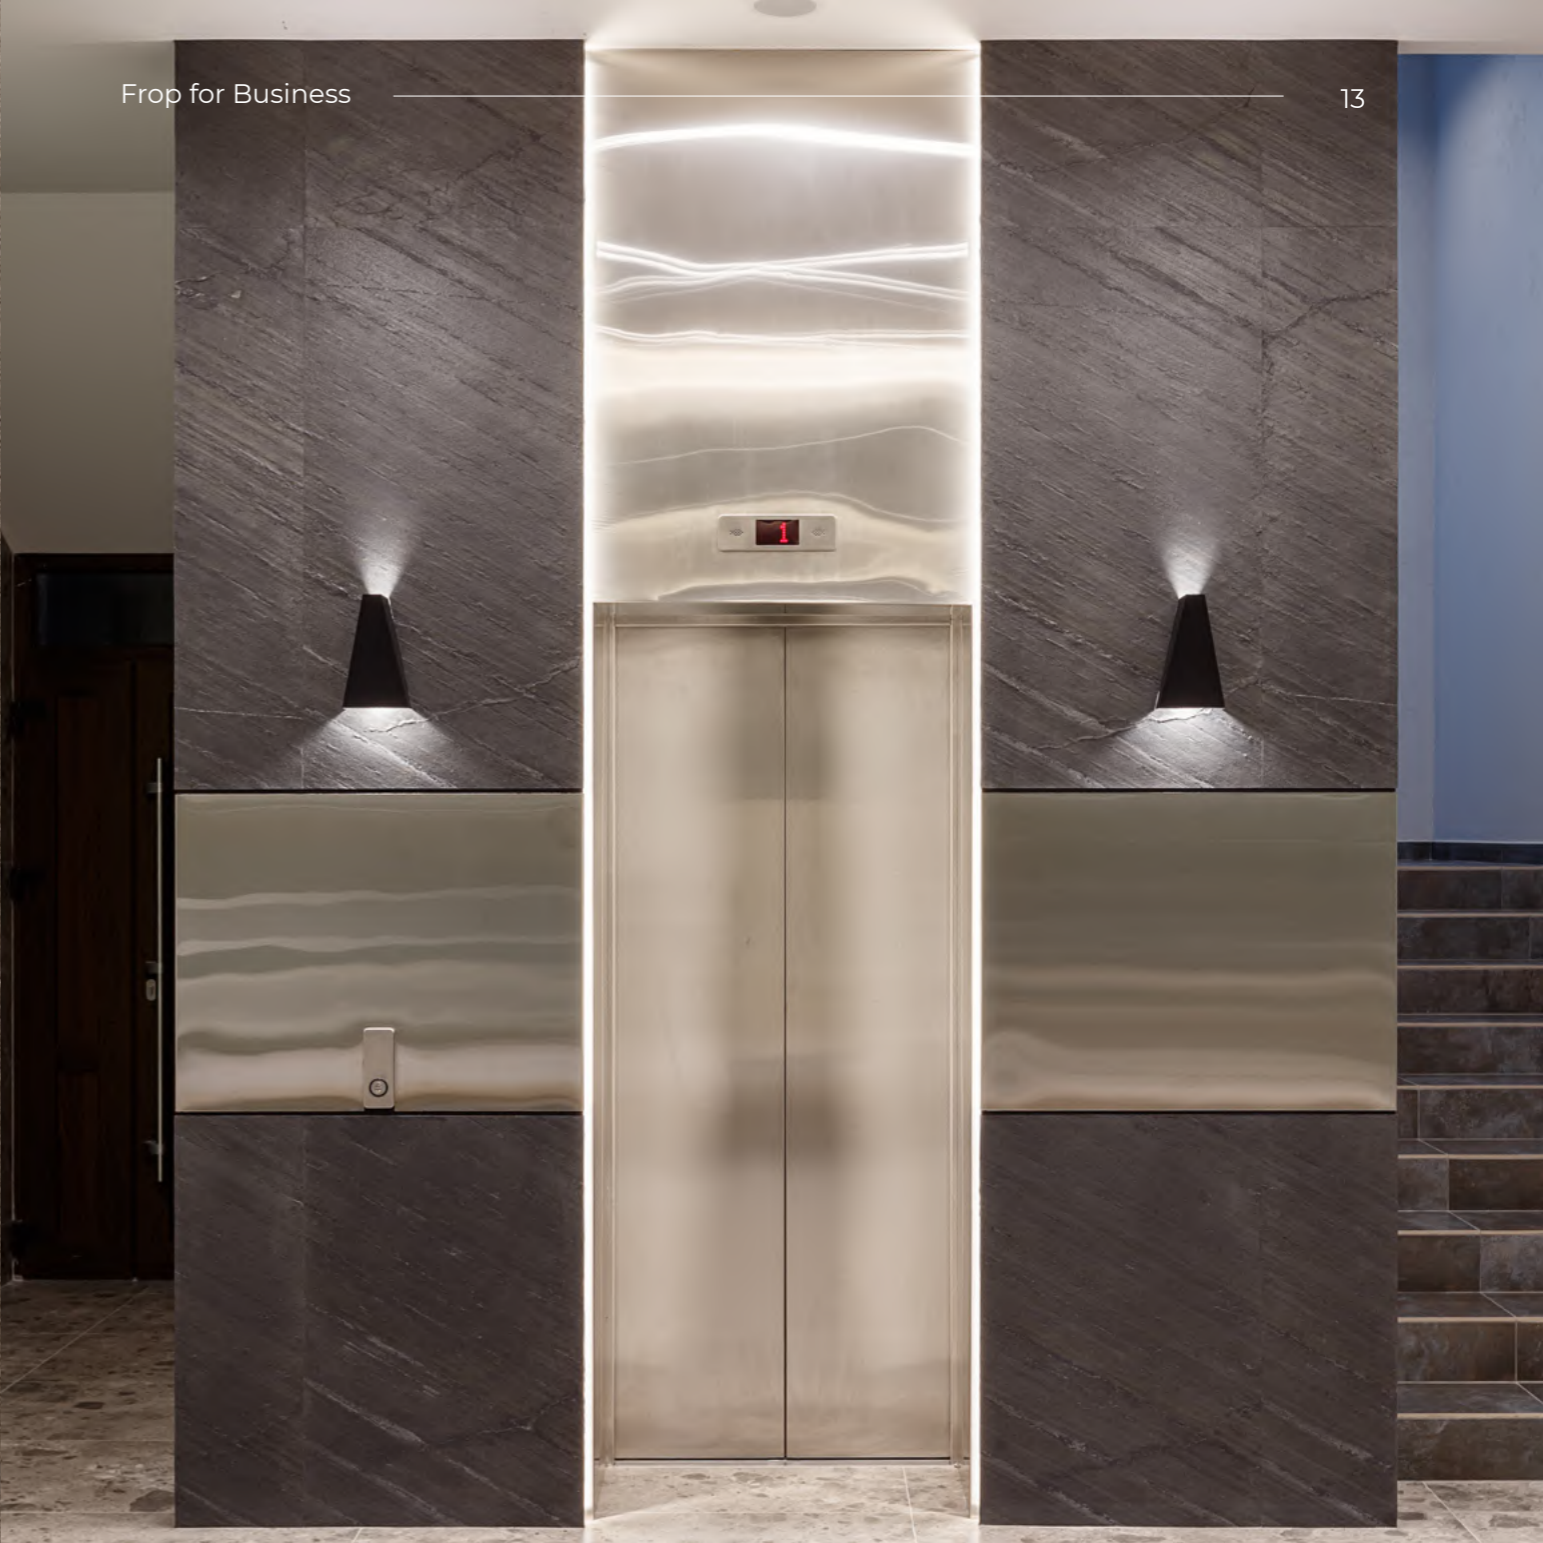

**Area** 6 000 m<sup>2</sup>

**Location** Yaremche

**Materials** Stone veneer, natural wood, logs, oak veneer, metal, glass, HPL

**Designer** PLANbureau

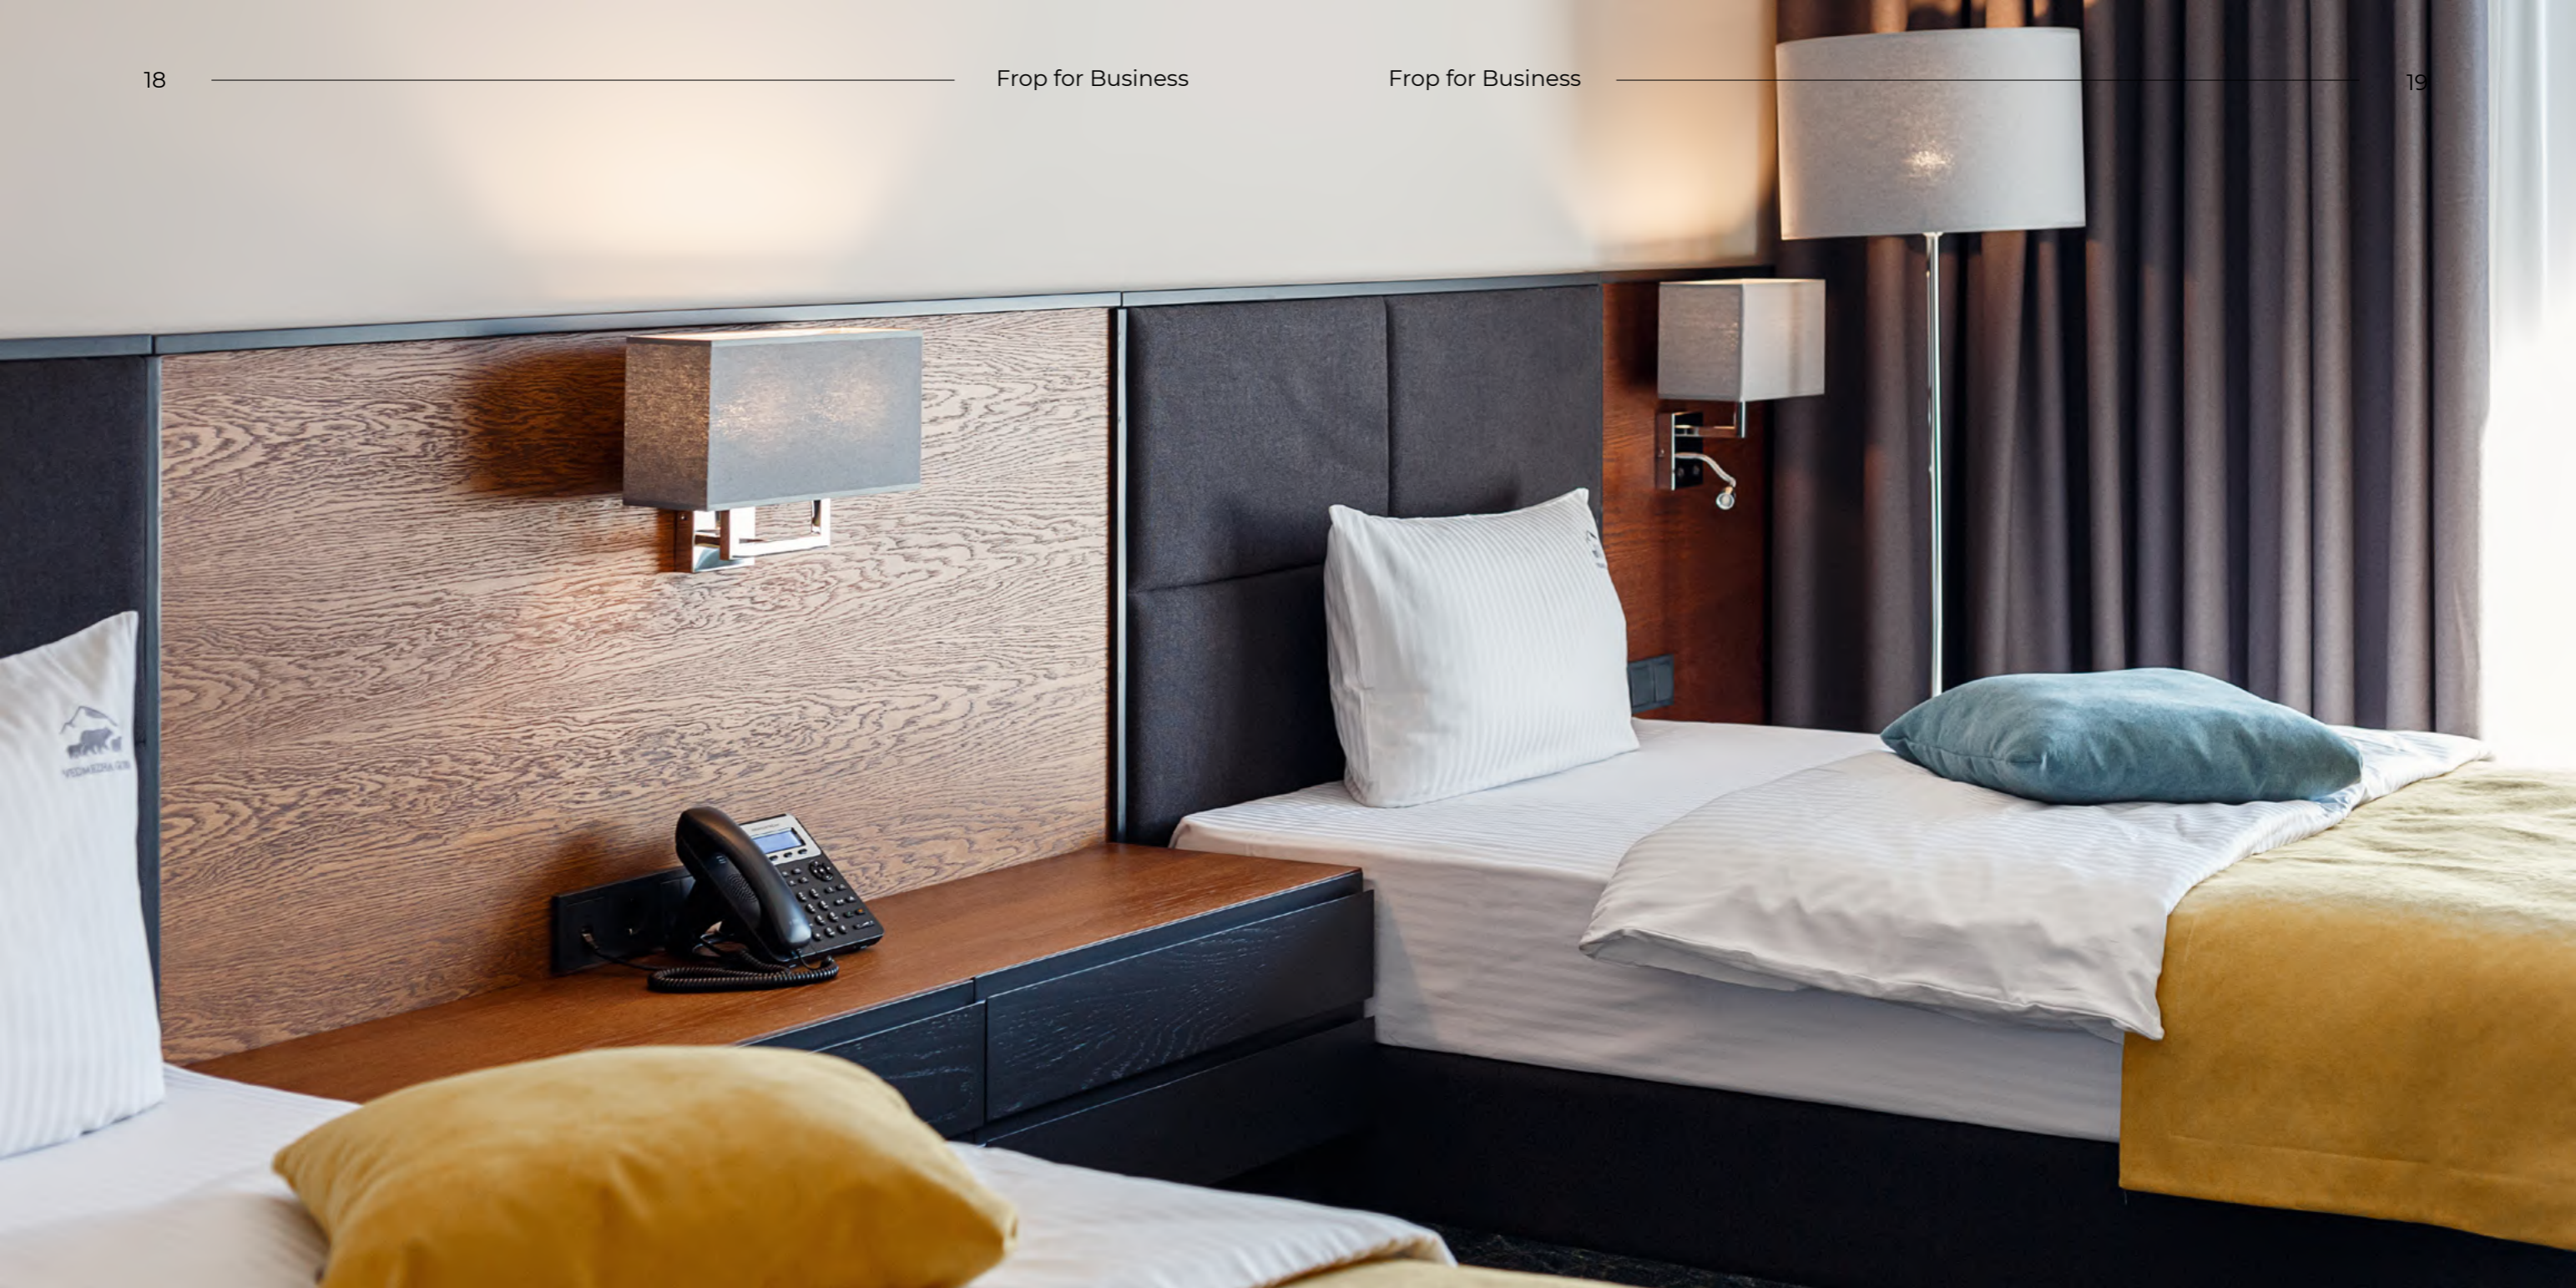

# Hotel and restaurant complex «Stanislavsky»

The hotel complex «Stanislavsky» combines natural materials, authentic elements, and designer solutions in one project. Located in the heart of the Carpathians, the project implementation with full designer support covered such important aspects as material selection, colors, textures, and functionality.

Thanks to well-established work processes and the professionalism of the teams, the project goal was successfully achieved, which was to produce interior elements and furniture for the hotel complex as quickly as possible.

Various engraving elements were also used to create decorative wooden elements that fit perfectly into the overall interior concept and attract the attention of hotel guests with their authenticity. The interior of the resort is beautifully accentuated with natural wood in combination with stone veneer and metal. Decorative root elements adorn the hotel's entrance area.

The complex includes hotel rooms, a gym, a conference hall, restaurants, an entrance area, a spa area, and a medical center.

**Area** 10 000 m<sup>2</sup>

**Location** Yaremche

**Materials** Natural wood, veneer, solid wood slabs, stone veneer, metal, glass, HPL, and particleboard

**Designer** SAVYTSKYdesing

# Cottage town «Skogur»

A cozy cottage town in the Carpathian Mountains. The interior of the cottages in this town is no less amazing. At the moment, 2 phases of 60 cottages have been put into operation, and 30 more are under construction.

The interiors of the cottages are made of natural wood to create a feeling of unity between humans and nature.

The successful combination of natural wood and metal guarantees the simplicity of the products, as well as their maximum ergonomics. Being in such an atmosphere fills you with energy and allows you to be «here and now».

**Area** 90 cottages

**Location** Yablunytsia

**Materials** Natural wood, metal, veneer

**Designer** VYMIR Desing Studio, 360° Desing Group, STI Desing

# Hotel and restaurant complex «Yaremche Club Hotel»

The combination of natural wood and particleboard with metal guarantees the simplicity of the products, while veneered panels used in various parts of the interior add a special charm and create an unforgettable image. Operational implementation and meticulous material selection are the main goals of this project.

Each detail of the interior fits into the overall style and shades, creating a maximally comfortable atmosphere. The interior impresses with its conciseness, creating a harmonious and pleasing image for the eyes. As a result, this project is a great example of how adherence to the basic principles of design can create an interior that impresses with its simplicity and elegance.

**Area** 1200 m<sup>2</sup>

**Location** Yaremche

**Materials** Natural wood, metal, veneered panels, and MDF

**Designer** Olha Riabova

# Hotel and restaurant complex «Vilson»

A hotel complex in the heart of Bukovel. To achieve the project's goal, we used ethnic elements and natural materials in the interior.

Complex design solutions, such as the radius bar symmetrically reproduced on the ceiling, helped create a unique location using exclusively natural materials. The complete implementation of the design project starts with the selection of high-quality and wear-resistant materials.

**Area** 3 400 m<sup>2</sup>

**Location** Bukovel

**Materials** Solid wood, veneer, metal

**Designer** STI Desing

# Hotel and restaurant complex «Fomich Group»

This passage describes the Fomich Group, a complex consisting of hotels, apartments, restaurants, conference rooms, and several spa zones. The interior design incorporates a variety of natural materials such as wood, bamboo, and stone, as well as materials like MDF and chipboard. The use of wooden panels for the interior adds a unique and stylish touch to the project, while the spa zones are equipped with thermowood.

The natural colors and materials used throughout the complex create a unified atmosphere, and the inclusion of real bamboo in the spa zones is a particularly interesting design choice.

Overall, the project aims to create a feeling of maximum natural comfort and aesthetic pleasure.

**Area** 12 000 m<sup>2</sup>

**Location** Bukovel

**Materials** Veneered panels, decorative moldings, thermoash, concealed mounting doors, natural wood (solid), metal, particleboard, MDF, bamboo

**Designer** STI Desing

# Beauty salon «Stories»

The interior is accentuated with durable HPL panels, natural veneer, and solid wood in combination with metal structures.

The salon is equipped with a radial reception desk made of plywood in combination with veneer and natural wood and is illuminated.

Professional selection of materials and ergonomic planning of functional furniture helped to implement the project according to the original design decision.

**Area** 300 m<sup>2</sup>

**Location** Ivano-Frankivs'k

**Materials** Natural veneer, HPL, solid wood, metal structures

**Designer** Subdive Desing Studio

# Workspace «Intellect Hub»

This coworking space was created specifically for people who value maximum comfort and ergonomics in their workspace. To achieve maximum ergonomics and comfort, natural veneer, ash wood, and metal were used in the space.

The interior is decorated with special removable panels that can be dismantled and installed in a new office if desired. Making the interior mobile is one of the tasks set before the team. Hidden mounting doors were also used on the project.

All of these materials were chosen to create a comfortable, ergonomic, and stylish workspace. The result is a space that promotes a creative and productive atmosphere for all visitors to the coworking space.

**Area** 350 m<sup>2</sup>

**Location** Ivano-Frankivs'k

**Materials** Natural veneer, solid ash wood, metal

**Designer** Samoriz design

# Legal Company «Moris Group»

The natural wood used in the project was intended to create a feeling of calm, warmth, and comfort. Thanks to well-tuned production processes and designer support, the project was completed with maximum precision.

All furniture used in the room is made of natural wood and reflects exquisite style. Such an interior will be an ideal choice for those who value comfort, style, and efficiency.

The overall atmosphere of the room will provide participants with favorable conditions for successful negotiations.

**Area** 40 m<sup>2</sup>

**Location** Ivano-Frankivs'k

**Materials** 100% solid oak wood

**Designer** Dnes Studio

# Restaurant «Fabbrica»

The project's goal was to create a comfortable family restaurant in warm tones, using durable materials. Simple lines, natural colors, and functionality were the top priorities that the FROP team set for themselves.

The design attracts with its natural colors and simplicity of lines, creating a pleasant visual effect. One of the key aspects of the project is the use of durable materials, such as solid oak, metal, veneered panels, and glass.

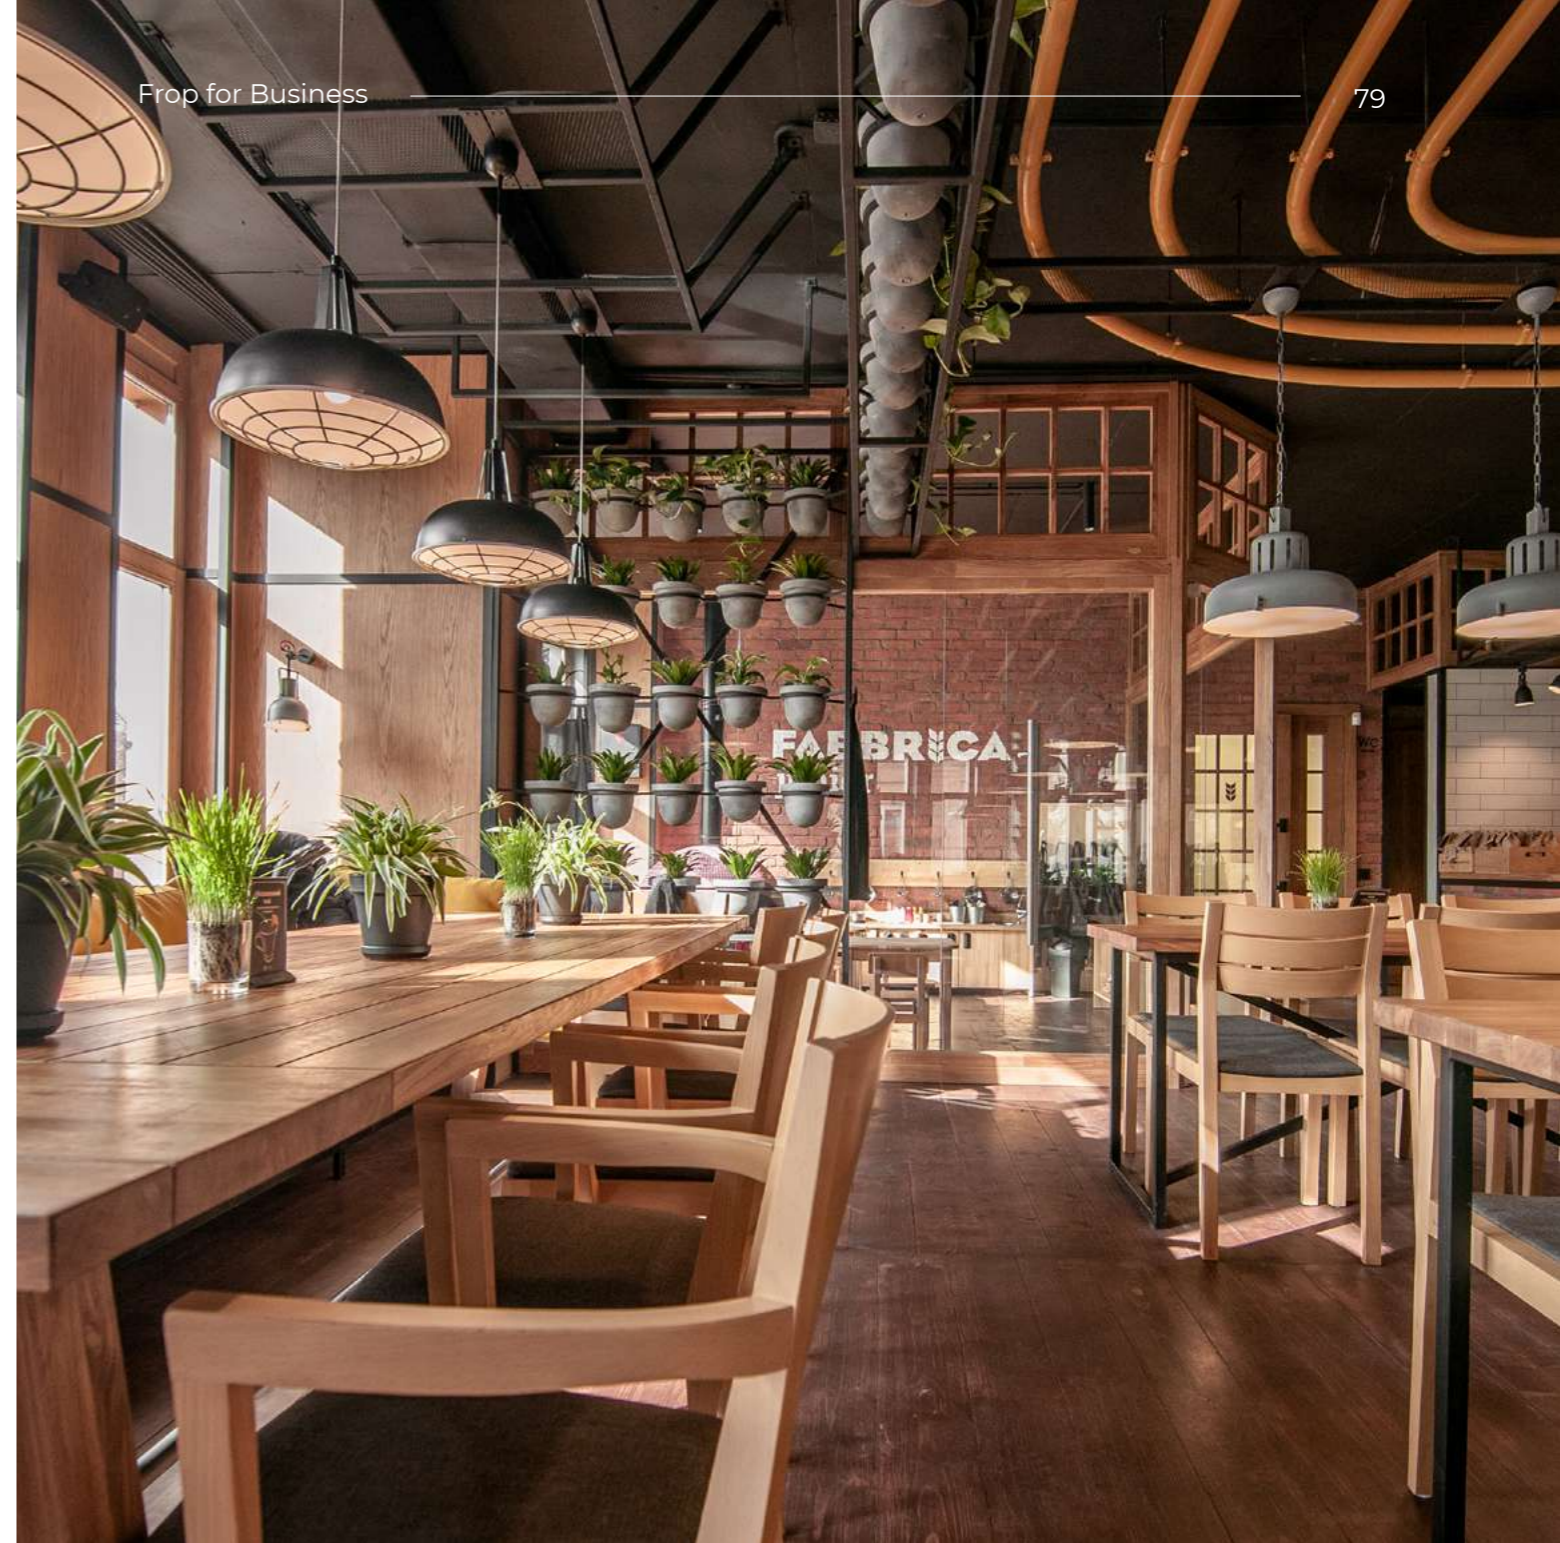

The use of such materials allowed for the creation of a spacious and functional interior that pleasantly surprises with its naturalness and elegance.

**Area** 300 m<sup>2</sup>

**Location** Ivano-Frankivs'k

**Materials** Solid oak wood, metal, veneered panels, glass

**Designer** Anna Pashynska

# Pizzeria «Fetrbush»

The unique interior of the pizzeria was created using natural materials such as natural veneer and solid wood.

The engraving was a designer solution that was used to create a unique interior of the pizzeria. Furniture made of solid wood and natural veneer was combined with metal structures to give the interior a modern look. The colors selected in the interior, in combination with the texture, create a pleasant atmosphere, and the materials reproduce the natural beauty of wood.

All these designer solutions were successfully combined to create a unique and stylish interior of the pizzeria. The result is a space that creates an atmosphere in which you want to be and relax.

**Area** 350 m<sup>2</sup>

**Location** Strymba

**Materials** Natural veneer, solid wood, metal, laser engraving

**Designer** STI Desing

# Office the FC «Prykarpattia»

The main goal of the project was to create a comfortable and practical headquarters for a football club. In the interior, colors are combined with wood, and metal elements added durability to the design.

**Area** 50 m<sup>2</sup>

**Location** Ivano-Frankivs'k

**Materials** Natural wood, wood veneer, metal

**Designer** SD interior design

# Hotel and restaurant complex «Loft7»

The Loft7 hotel and restaurant complex is located in the cultural center of Ukraine. This is a space free of unnecessary details, executed in a modern loft style with elements of classic design. The combination and successful combination of two styles in the interior creates an atmosphere to which you want to return.

To achieve this, we covered the walls with classic green panels. We also added sturdy tables made of solid wood with metallic supports, which are monolithic and add both aesthetics and substantial strength to the products.

The main goal of the project was to combine modern elements of industrialism with classic English style in the interior. And as a result, we got an interior that will not leave anyone indifferent.

**Area** 1500 m<sup>2</sup>

**Location** Lviv

**Materials** Solid wood, veneer, metal

**Designer** Andriy Asanov

## «Promprylad. Renovation»

The innovative center is established on the basis of an old factory that operates at the intersection of four areas of regional development: the new economy and urbanism, contemporary art, and education. It combines coworking, business, office, restaurant, bar, and more, creating a place for bold ideas to be realized.

The design of the innovation center is characterized by the use of modern and stylish materials such as solid wood, veneer, and metal, creating an industrial atmosphere that promotes creative thinking.

The coworking and business center space is equipped with comfortable tables and chairs, creating a pleasant working atmosphere.

PROMPRYLAD continues its development and expansion, and together with its team, has created about 6000 square meters of interior for this center, providing comfort for a large number of employees. Currently, they are implementing an additional 2000 square meters, which will significantly complement and expand the center's capabilities and functionality.

**Area**                      Implemented 6000 m<sup>2</sup> in the process 2000 m<sup>2</sup>

**Location**                      Ivano-Frankivs'k

**Materials**                      Solid wood, veneer, metal

**Designer**                      Anna Pashynska

# Hotel and restaurant complex «Twins»

**T**wins Hotel is located in Bukovel, among picturesque mountain peaks, surrounded by pristine Carpathian nature. The room fund was carefully thought out and developed to ensure comfortable and luxurious stays for guests.

The Twins Hotel project was realized in two months thanks to the work of experienced designers and craftsmen. Every detail in this hotel fits into the overall style and shades, creating a maximally comfortable atmosphere.

The best materials were used to create this interior, including natural wood, logs, particleboard, MDF, veneer, and metal.

**Area** 1200 m<sup>2</sup>

**Location** Bukovel

**Materials** Natural wood, plywood, particleboard, medium-density fibreboard (MDF), veneer, metal.

**Designer** STI Desing

# Hotel and restaurant complex «UnderHill»

**W**e created a unique interior in the hotel complex using materials such as solid wood, veneer, metal, textile, LED lighting, particleboard, and MDF. The metal structures used in the restaurant created a modern and stylish design that complemented the overall interior concept. The structures were made of high-quality materials, ensuring their durability and resistance to external factors. This design provided a sense of space and attractiveness, creating a comfortable atmosphere for relaxation and enjoying delicious food.

We used lighting in combination with natural wood to create interesting installations in various parts of the hotel. Veneer and textiles, in turn, provided additional softness and comfort to the interior, creating a harmonious overall image.

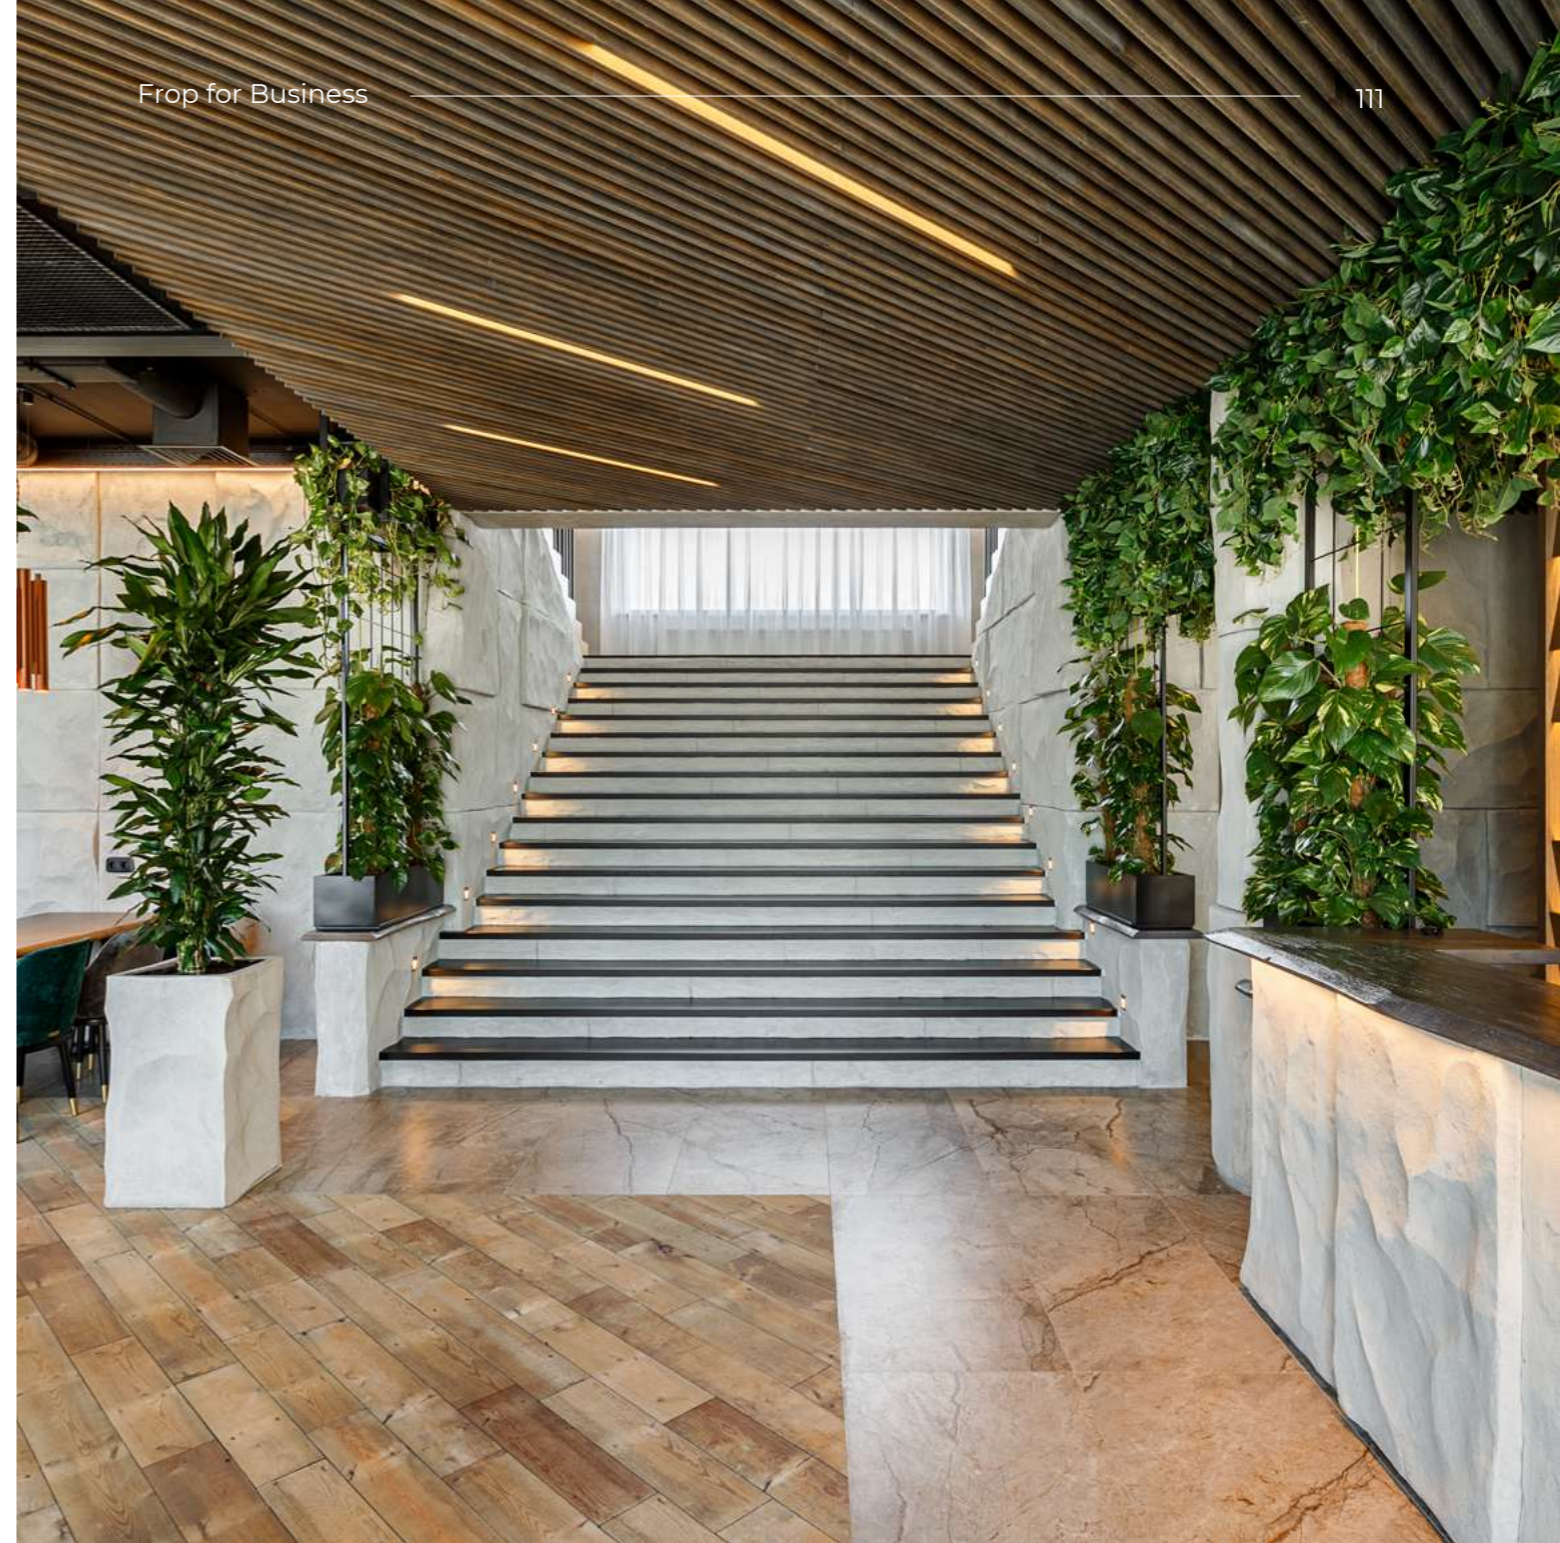

Each interior detail was created with attention to detail to fit seamlessly into the overall style and provide a sense of harmony.

**Area** 3 000 m<sup>2</sup>

**Location** Pidhiria

**Materials** Solid wood, veneer, metal, textile, lighting, particleboard, medium-density fibreboard (MDF)

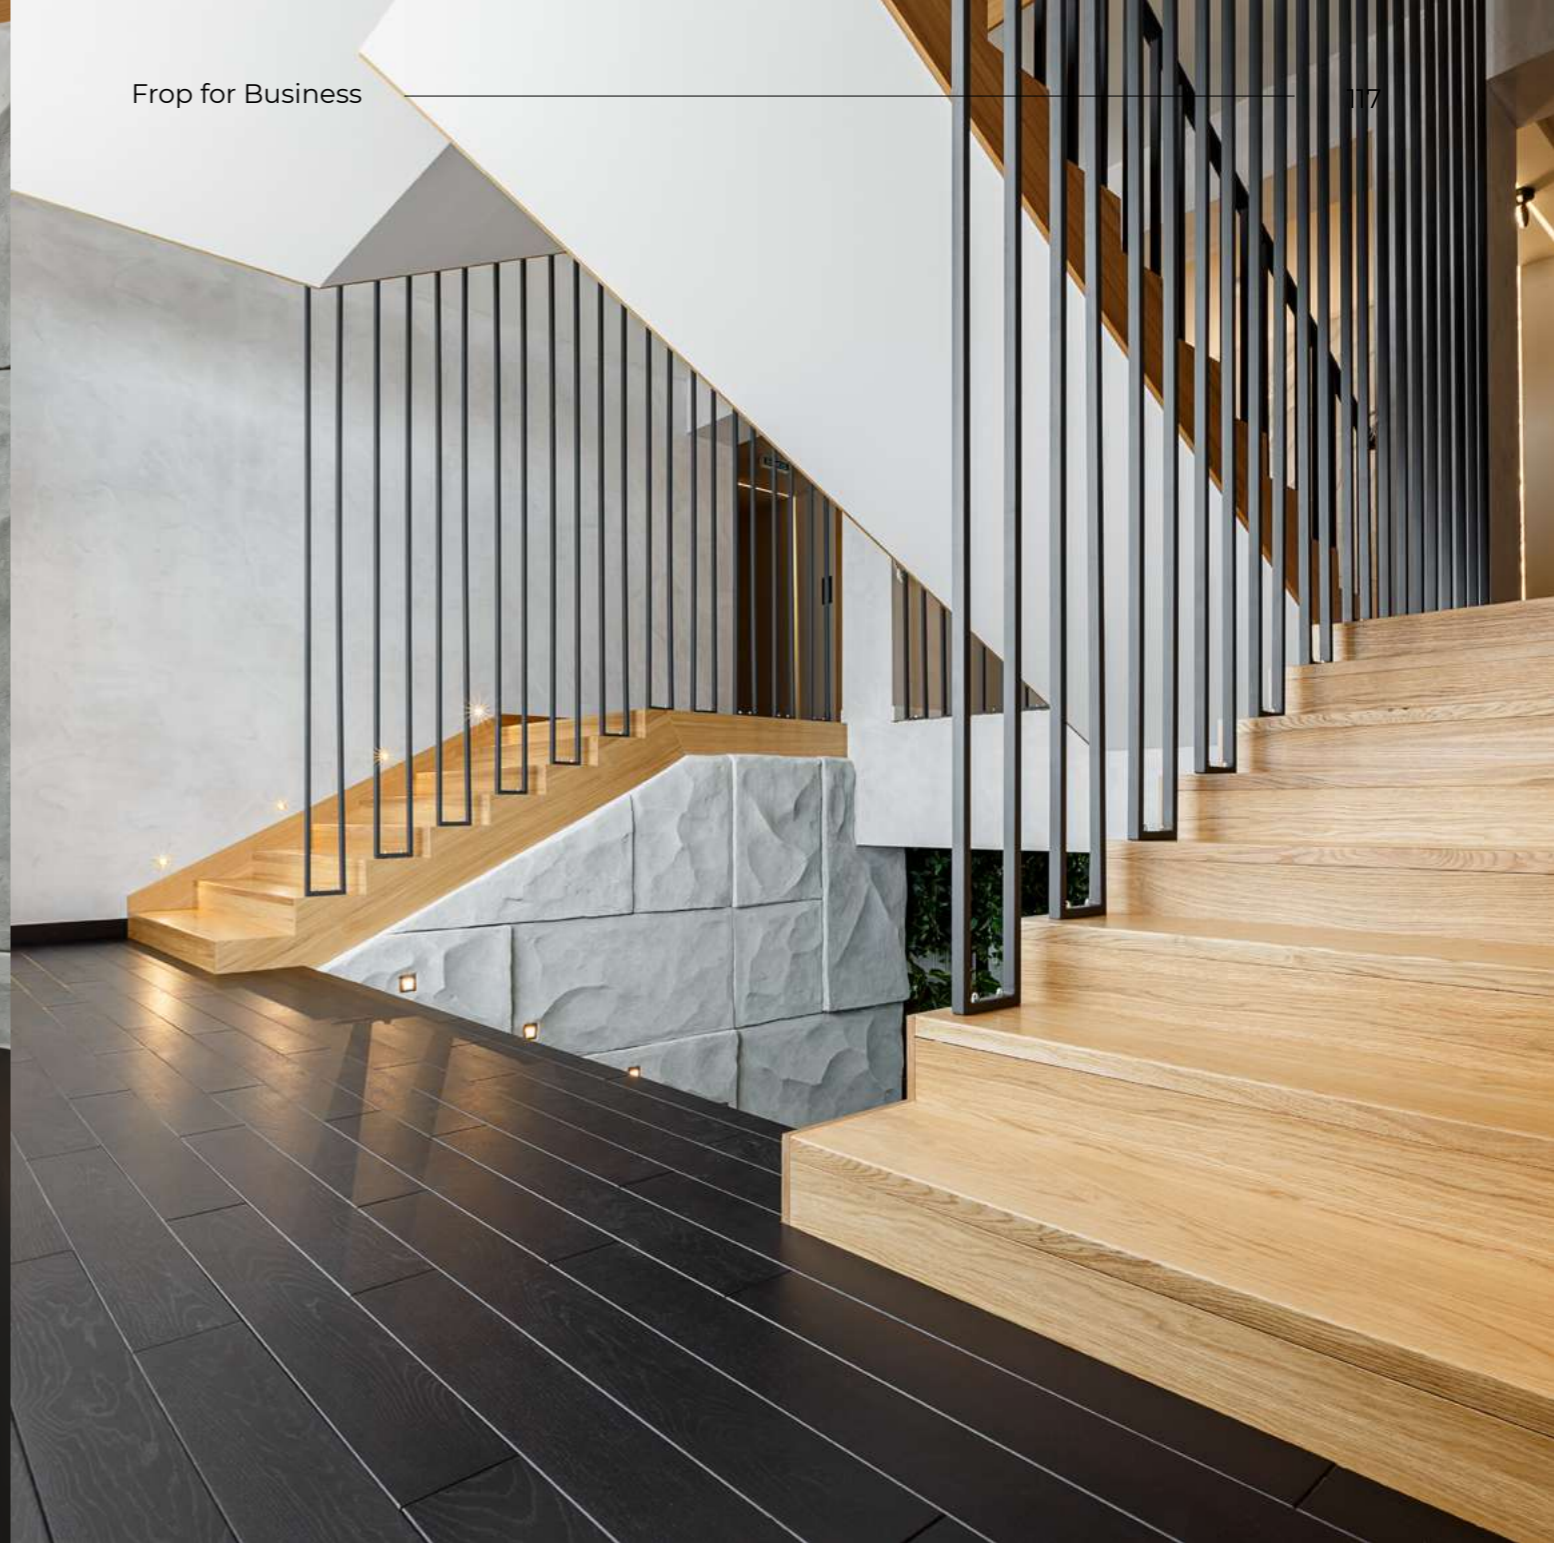

**Designer** 360° Design Group, Bratiuk Inessa, Ferlam
